

3DBOXX XTREME

The Fastest Workstations in the World . . . and available with 4 GPUs

***"The fastest retail workstation
we've tested."***

- Desktop Engineering, May 2011

Throughout 2011, independent reviews and testing from leading publications like *Desktop Engineering*, *Tom's Hardware*, *Cadallyst magazine*, *SPEC.org* and *Jon Peddie Research*, have been unanimous in their praise for 3DBOXX XTREME workstations, the performance-enhanced solutions from BOXX.

XTREME workstation	Over Clocked Processor	GPUs	GHz
3DBOXX 3960 XTREME	Quad core Intel Core i7	2	4.5
3DBOXX 4860 XTREME	Six core Intel Core i7	2	4.3
3DBOXX 4880 XTREME	Six core Intel Core i7	4	4.3
3DBOXX 8550 XTREME	Dual Six core Intel Xeons	4	4.3

Single Processor Solutions

The fastest single socket workstations for frequency driven applications like Autodesk® Revit®, 3960 XTREME workstations deliver high performance at an entry level price. If visualization is an essential aspect of your workflow, the solution is 3DBOXX 4880 XTREME. Featuring up to 4 GPUs, 4880 XTREME is the most powerful single processor workstation ever designed. If your workflow doesn't require 4 GPUs, 3DBOXX 4860 XTREME is the ideal alternative. Both deliver outstanding support for 3D animation, modeling, and motion media applications.

Dual Processor Solution

3DBOXX 8550 XTREME is, hands down, the fastest workstation in the world. Designed to accommodate multi-threading, multiple applications, and complex production pipelines, 3DBOXX 8550 XTREME delivers high-powered, multitasking performance for 3D design, animation, visualization, desktop rendering, VFX compositing, video editing and digital intermediate.

Why Buy BOXX?

3DBOXX XTREME Series workstations are designed and thoroughly tested by BOXXlabs for maximum performance and stability with Autodesk and other professional applications. Our expert sales consultants understand your workflow needs and legendary BOXX Technical Support provides unparalleled knowledge of hardware and industry leading software.

Why Go XTREME?

The key to increasing productivity and profit is to accomplish more in less time. Faster turnaround means fewer employee hours invested and more time for new projects and clients—and that means greater income for your creative business. So if time is money, shouldn't you be using the fastest workstations in the world?
